Endless IDs lead to endless opportunities

How did we get to that number?

By classifying more than 2,000 ID types

from over 72M devices across 138 countries

At Microblink, we're able to mine through a dense ecosystem of documents,

utilizing precise data extraction and photo capture for any ID.

Did you know there are 10 different passport types issued globally?

Whether it's a Class D driver's license in NYC or a Consular ID in Pakistan, our Al-powered identity solution delivers accurate and fast results — region to region.

Flawless Integrity Across the Board

On average globally, our industry-leading identity solution has a

Region	Average accuracy % for all IDs and fields on IDs
Africa	96.78
APAC	96.99
Caribbean	97.81
Central America	97.98
Europe	97.49
The Middle East	95.80
North America	97.91
South America	95.98

Of course, ID verification isn't limited to accommodating large regions.

Enabling successful onboarding from lowly populated regions with varying document types is challenging.

Luckily, Microblink supports IDs from a number of small population countries:

COUNTRY	POPULATION
Bermuda	63.9k
Bahamas, Brunei, Iceland	300k - 500k
Luxembourg,	

Maldives, Malta

Accounting For Frequent ID Updates

How often are identity documents updated? In some areas, more than you can imagine.

Take Mexico for example, where there are over 250 types of valid driver's licenses.

That's a lot.

At Microblink, our proactive approach involves training ML models on newly issued documents — to minimize friction for clients and end-users alike.

The Microblink Solution

A user places or holds the document in front of the camera.

They then flip it over if there is data on the other side.

9:41 ×		*
Resu	lts	×
FIRST NAME Jane	Jane Smith United States, Idaho DL	
.AST NAME Smith		
ULL NAME Smith, Jan	e	
DATE OF BIR		
AGE 31		
DATE OF ISS 03/18/201		
ULL ADDRE	ss Drive, Coeur d Alene ID 8381	5
